

Dechra has the solution for all your topical needs

Dechra Topical Product Range

With the rise of antimicrobial resistance in clinical practice, topical therapy has become increasingly important.

Topical treatments are ideal for skin conditions, as the antimicrobial agent is being applied directly to the site of microbial overgrowth. The topical products in the Dechra range can be used for minor skin conditions, with options available for antimicrobial, antifungal and antibiofilm activity.

Animals with skin disease often have an impaired skin barrier, leading to dry and more permeable skin, making it more susceptible to external allergens and microbial overgrowth. Topical products can have a soothing effect on the skin, helping to rebuild and maintain the skin barrier and rebalance the microbial flora. The Dechra range contains ceramides, which have been shown to be beneficial to the skin of atopic dogs¹.

Treatment should be tailored to each individual patient and compliance is essential for success. The Dechra range contains shampoos, spray conditioners, mousses and wipes, providing a solution for every pet and owner.

DID YOU KNOW?

Chlorhexidine has been shown to be effective against both sensitive and multi-drug resistant *Staphylococcus pseudintermedius*² and 2%-4% concentrations have been shown to provide residual antibacterial activity on canine skin for at least 10 days³.

DermAllay General, soothing

Products

DermAllay Oatmeal Shampoo
Gentle, soap-free, soothing
355mL Bottle

Why Dechra Dermatology?

Trusted Ingredients

Dechra's topical range has key ingredients you can trust such as chlorhexidine, miconazole and ketoconazole.

Cutting Edge Technology

Many of our formulations are enhanced with key ingredients like TrizEDTA and Ceramides.

Multiple Option Therapy

You can prescribe products that work together to increase client compliance, such as wipes and sprays for in between bathing, or mousse instead of shampoo for the colder months.

Dedicated Dechra Veterinary Account Managers

Available in your area and ready to assist on dermatology issues and products.

Technical Support and Education

Contact us for full technical support. We also have our Dechra Academy for flexible on-demand learning when you need it, with free CPD courses available for vets and nurses. More information is available on our website.

Vet Only Range

Bring clients back to your clinic with Dechra's Vet Only range.
